- Battery voltage: 4.8 V
- Operating time on battery: 12 hr

Product highlights

Extra small parent unit
The parent unit is very small, so that you can put it easily in your pocket or clip it to your belt. Easy to take with you when you move around the house.

Digital System check
A visible and audible warning is activated if the communication link between the baby unit and parent unit is unreliable.

Rechargeable parent unit
Putting the parent unit on the charging base will automatically start recharging of the batteries, so it's always ready for portable use.

Number of channels
A choice of channels significantly reduces the risk of interference or sounds from other baby monitors in the neighbourhood.

Sound level lights
Sometimes its a great help to 'see' when your baby makes a sound. This row of lights provide you with a clear visual indication.

Range in open air
In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without losing contact.

Night light
A soft, glowing light is reassuring and provides a focal point in the dark.

Digital Pilot Tone
A special tone that is transmitted along with the audio signal minimises the chance of interference from other wireless appliances.

Adjust microphone sensitivity
Possibility to set the sensitivity of the microphone so you only hear the sounds you want to hear.

Use in & around the house
Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

Charging base
Thanks to the built in battery charger in the base, you get extra freedom (when fully charged) to take the parent unit with you around the home and stay in touch with your baby. It' s also a convenient place to store the parent unit, and ensure it's always ready for use.

Low battery indication
To know in time when the batteries need to be recharged or replaced.

Volume control
A handy rotary control sets the volume to the ideal level to suit your preference.
